

## Important Changes to Monadnock® Expandable Baton Product Line

---

Defense Technology® is pleased to announce the newest update to the Monadnock expandable baton line. The specific changes are outlined below:

- All AutoLock® batons will be offered in a single, standard configuration that will simplify the baton product line, while still offering the most popular configurations to the end user:
  - Standard End Cap
  - Power Safety Tip
  - Foam or Super Grip
  - Improved tube packaging
- The standard baton can be customized by the end user using new modular end cap adapters to convert AutoLock or Friction lock batons to a Wedge or Dome (formerly “Hindi™”) End Cap style.
- All clamshell packaging will be replaced with improved tube packaging incorporating new end caps with hang tags.
- Duty or Patrol kits will be replaced by ordering the standard baton, and the applicable end cap adapter and baton holder.

This change will allow elimination of numerous part numbers that were specific to wedge or Hindi end cap, standard tip, or clamshell packaging configurations. These items will be placed on pending obsolete status, and will be available for ordering until inventory is depleted. The cross reference chart below shows the affected pending obsolete part numbers as well as the new part numbers that will replace them.

Some products on the 2022 mid-year price list will be identified as Pending Obsolete – Order Quantities May be Limited.

If you have any questions, please contact Customer Service at 1-800-347-1200 or [customercare.wy@safariland.com](mailto:customercare.wy@safariland.com).
